Business with TRENDnet

TRENDnet offers a complete line of reliable award winning end-to-end networking solutions for the most demanding business and mobile environments. Companies of all sizes are leveraging the power of TRENDnet networks to increase productivity, reach new customers, and lower costs. From fiber and switches at the network core to Internet cameras and peripherals at the edge, TRENDnet offers scalable and secure enterprise class solutions. Dedicated 24/7 technical support, low RMA, and 20 years experience contribute to TRENDnet's price-to performance leadership position. Choose TRENDnet and you will discover that we are building networks people trust.

The TRENDnet Experience

In today's fast paced culture, TRENDnet focuses on providing an intuitive and positive consumer experience. All end user touch points are systematically evaluated and improved. Whether it's a product setup, consumer education, or troubleshooting experience we want to leave a smile on our customer's face. TRENDnet maintains 24/7 toll free customer service, industry leading warranties, an extensive online technical support knowledge base, and a variety of dynamic educational vehicles.

Total Quality Focus

Over fifty thousand PC World readers voted TRENDnet as a top quality router brand. TRENDnet's management system is ISO 9001:2000 certified. TRENDnet emphasizes continual improvement as an essential component of its quality management system. This ensures rigorous process standards across the entire organization with respective product development, product quality, and all other pertinent enterprise functions. TRENDnet maintains one of the industry's lowest defect rates. Our state-of-the-art manufacturing facilities are ISO 9000 certified, and our products bear UL, FCC, and CE seals.

Product Development

For over 20 years, TRENDnet engineers have consistently launched first to market networking solutions. TRENDnet works closely with companies such as AMD, Atheros, Broadcom, Intel, HP, Marvell, and Microsoft to produce high performance digital network environments. By absorbing customer feedback and anticipating a complete range of networking needs, TRENDnet develops comprehensive software and hardware solutions. Complimentary software solutions empower users to better secure, share, and manage their networks.

Environmental Position

TRENDnet is committed to creating environmentally sound networking hardware solutions and promoting practices that respect the natural environment. This means not only creating more energy efficient products, using recycled packaging content, and reducing heavy metals from our networking hardware products, but also promoting an internal culture of environmental awareness and everyday green practices.
